GreenTech Automotive Announces First Electric Vehicle Dealer in Caribbean Islands

(October 16, 2015) Tunica, Miss. -- GreenTech Automotive (GTA), a U.S. automotive manufacturer dedicated to developing and producing environmentally friendly, energy-efficient vehicles, today announced Cayman Automotive Leasing & Sales, Ltd. as their Dealer for the MyCar in Caribbean Islands.

GTA will manufacture the award-winning "MyCar" in Tunica, Mississippi. The GTA MyCar is a two-seat Low-Speed Electric Vehicle (LSEV) that produces zero emissions, provides segment leading driving range, and is recharged by a 110/220 Volt AC wall outlet or standard J1772 charging station. "Cayman Automotive introduced the Caribbean's first electric vehicles in 2009. The partnership with GTA we now have affordable alternative fueled vehicles to add to our portfolio that will supply some key market niches in the Caribbean Islands", says dealer John Felder Owner of Cayman Automotive Leasing & Sales, Ltd.

"We are excited to partner with Cayman Automotive Leasing & Sales, Ltd. Cayman Automotive is a big reason why electric vehicles have been widely accepted in the Caribbean Islands. Their sole focus is to distribute, service and promote electric vehicles along with other alternative vehicles. They are the perfect fit for the MyCar", said Dennis Carter, Sr. Director of Global Sales for GTA. "We will continue to announce our strategic partnerships and expansions as they occur."

About GreenTech Automotive:

GreenTech Automotive (GTA) is a U.S. based automotive manufacturer dedicated to developing and producing environmentally-friendly, energy-efficient vehicles. GTA's core values encompass green technology, affordability and U.S. job creation. For more information, visit www.gtaev.com.

About Cayman Automotive Leasing & Sales, Ltd.:

Cayman Automotive Leasing & Sales, Ltd. is a fully Licensed Automotive Broker Company. They have the ability to sell any new or certified pre-owned vehicle manufactured in the U.S. now featuring a wide variety of all electric vehicles. Their business model is unique and the first of its kind in the Caribbean. They continue to bring to the community the latest in electric vehicle (EV) technology and proven reliable service, while providing a level of customer satisfaction that exceeds expectations.

Cayman Automotive was instrumental in providing a network of charging stations that will handle the charging needs in the Cayman Islands. Cayman Automotive introduced the first solar panel charging stations in the Caribbean. They have two authorized service centers in Grand Cayman and Cayman Brac to handle the service needs of their customers and other sister Islands.
